

PRODUCT DATA

SperseStab™-6050 UV Stabilizer

INTERSPERSAL

SperseStab™ 6050 is a 100% active liquid UV stabilizer system designed for use in coatings and systems where acids may be present. Based upon a N-OR HALS and synergistic UV absorbers the system is tolerant of acids and is ideal for PVC, Acrylics and alkyd-based coatings. SperseStab™-6050 can also be used in liquid color/additive masterbatches, and candles.

Performance benefits

- Synergistic formulation provides outstanding light stability
- Lower viscosity than similar competitive products
- Protects against discoloration in candles especially in vanillin formulations
- Liquid form is easy to handle and disperse
- Good compatibility with PVC, urethanes, acrylics and alkyd resins
- Low color contribution

Typical properties

Appearance	clear pale straw colored liquid
Active UV stabilizer content	100%
Freezing temperature	< 0°C

Guidelines for use

Typical levels of use in coatings range from 0.3% to 3% by weight.
Contact us for a custom recommendation for your application.

Storage

Protect from freezing temperatures, extreme heat, or direct exposure to sunlight.

Health and safety

Review the safety data sheet (SDS) prior to handling or using this product.
